FDD Abstract

25X1X

INFORMATION ON THE HETTSTEDT NON-FERROUS METAL ROLLING MILL (German; 35 pp; [REDACTED])

25X1A

This [REDACTED] document consists of 7 parts.

Part 1, 3 pages, dated 25 January 1952, is a report on the discussion of the rolling mill program by the German Trade Center for Metal. The programs for Kirchmoester, Ilse and Hettstedt for February and March 1952 were discussed. In that period Hettstedt will be able to put out about 17,200 tons of heavy plate, but is supposed to deliver 28,865 tons also.

Part 2, 2 pages, dated 9 January 1952, is a letter reporting on some of the requirements of the Hettstedt metallurgical plant. The plant requires 1950 tons of copper castings (Formate) monthly. The Mansfeld Combine smelted only 550 tons for them in January. Since Hettstedt has no copper smelting furnaces, Mansfeld should be instructed to supply the remaining 1400 tons also.

Part 3, 2 pages, dated 31 December 1951, contains the minutes of a meeting at Hettstedt which all plant managers attended. The meeting consisted mainly of a series of pep-talks on achievements to be realized at Hettstedt during 1952.

Part 4, 5 pages, dated 29 December 1951, reports on a meeting of the plant manager and section chiefs at Hettstedt. This was the final plan discussion for 1951 and was held in a festive mood. The meeting dealt mainly with a review of accomplishments during 1951. Hardly any actual figures are given.

Part 5, 5 pages, dated 5 January 1952, consists of the minutes of a meeting of plant managers and section chiefs. The agenda included illiquid /sic/slabbing material, prices for scrap, savings in power consumption, insufficient nickel supply, and extra vacations.

Part 6, 9 pages, dated 12 January 1952, contains minutes of a meeting of plant managers and section chiefs at Hettstedt. The agenda included the metal supply situation, current status of different phases of production, and collective agreements.

Part 7, 9 pages, dated 19 January 1952, contains minutes of a meeting in which the same people as above participated. This meeting also covered the metal supply situation and production data on the various processes at Hettstedt. Other items discussed included a training program for workers' brigades and accident prevention.
